TECHNICAL SKILLS

Languages: JavaScript, Python, C++, TypeScript, SQL
Frontend: React.js, Next.js, Tailwind CSS, HTML5
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, Firebase, MySQL
Cloud, AI & APIs: OpenAI API, Google Gemini API, n8n, Dialogflow, Vercel
Developer Tools: Git, GitHub, Postman, Figma, WebRTC, AWS/OCI

PROJECTS

PulseTalk | *React.js, Node.js, Express.js, Firebase, Dialogflow, OpenAI API, WebRTC, Tailwind CSS* | [GitHub](#) 2025–2026

- Architected a full-stack AI telehealth platform for rural India; implemented voice-based symptom triage via **Dialogflow NLP** and clinical workflow automation via the **OpenAI API**.
- Engineered real-time teleconsultation using **Daily.co WebRTC**, persistent health records in **Firebase Firestore**, and role-specific dashboards for patients and ASHA healthcare workers.
- Designed a scalable **Node.js + Express.js** backend with offline-resilient architecture; **Winner** — HACKFEST SDC, REC Banda | **Finalist** — HACKSPACE GDG Noida | **Finalist** — HACKFEST GDG New Delhi.

NyayaSarathi | *TypeScript, Next.js, React, Tailwind CSS, Google Gemini API, Vercel* | [GitHub](#) 2025

- Built a full-stack LegalTech platform integrating **Google Gemini API** to translate legal queries into structured, plain-language guidance — improving legal accessibility for non-expert users.
- Engineered a modular **Next.js + TypeScript** frontend with a clean services-layer API separation, responsive **Tailwind CSS** UI, and organized navigation across legal topics.
- Deployed on **Vercel** with secure environment-variable API management; architected for scalable domain expansion across additional legal categories.

GlobeTrekker | *TypeScript, React, Vite, Google Gemini API, Firebase, Tailwind CSS* | [GitHub](#) 2025

- Developed an AI-powered travel planner integrating **Google Gemini API** to generate structured, day-wise personalized itineraries from natural language user input.
- Implemented a modular **React + TypeScript + Vite** architecture (components / services / hooks / data layers) for fast bundling and clean separation of concerns.
- Deployed on **Vercel** using environment-based API configuration and deployment settings with a responsive **Tailwind CSS** UI and minimal external dependencies.

EXPERIENCE

Indian Institute of Technology, Kanpur Oct 2024 – Jun 2025
Project Intern — Virtual Labs, Ministry of Education Initiative Kanpur, India

- Contributed to India’s national **Virtual Labs platform** (IIT Kanpur / MoE), improving a physics simulation accessed by thousands of STEM students across the country.
- Refactored simulation logic, enhanced frontend UI and experiment documentation on a government-backed open-source codebase; changes merged to the live platform.

BhuBhraman June 2024 – Jul 2024
Web Development Intern Chitrakoot, India

- Developed and shipped responsive frontend interfaces; implemented features end-to-end and delivered production-grade code in an agile startup environment.

Google Sep 2025 – Feb 2026
Student Ambassador (Nationally Selected) Kanpur, India

- Conducted AI workshops on Google Gemini and Google Cloud for **500+ students**; drove developer ecosystem adoption and cloud certification awareness on campus.

GeeksforGeeks Jan 2026 – May 2026
Campus Mantri Varanasi, India

- Organised DSA contests and system design workshops for **200+ students**; mentored peers on algorithmic problem-solving and product-company interview preparation.

ACHIEVEMENTS

Winner — HACKFEST by SDC, REC Banda (2026)
Finalist — HACKSPACE by GDG Cloud Noida (2026)
Finalist — HACKFEST by GDG Cloud New Delhi (2025)
250+ LeetCode — Arrays, Strings, Trees, Graphs, DP
Open Source — IIT Kanpur Virtual Labs (MoE) & Code Social; PRs merged to production

CERTIFICATIONS

OCI Certified: [Generative AI Professional](#) | [Data Science Professional](#) | [DevOps Professional](#) Oracle, 2025

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University (AKTU) — REC Banda Oct 2023 – Jun 2027
B.Tech, Information Technology Uttar Pradesh, India
